

GET CYBER ESSENTIALS CERTIFIED

INTRODUCTION TO THE SERVICE

Read the news. Hardly a day goes by without a report of a high profile cyber security incident. No organisation is immune.

Companies are building cyber security features into all the business operations that they perform. To ignore the threat is simply too high a risk.

Cyber Essentials provides a high level framework for companies and organisations that are looking to take security seriously. Needing to be certified to supply services and products? Concerned that you need to develop secure networks and working practices?

Cyber Essentials is a great place to start.

Certification is straightforward and easier than you might think.

It means reviewing your networks. Your Firewalls. Passwords. Security Policies. User Accounts. System Backups. Logs. Recording your understanding in the Cyber Essentials Questionnaire.

Ambersail works with you. We help you understand and document your network. Answering your questions. Advising on corrective actions. Removing any confusion or doubt.

Once complete, we process your questionnaire. Ensuring it is completed in the right way. That your technology arrangements are documented correctly.

Our expertise in network security and experience in getting clients compliant ensures you will have a smooth journey to getting Cyber Essentials Certified.

“ *The security of customer data is key to our day to day business operations.*

Ambersail continues to provide Valldata with high quality audit and assistance services to support the security of our networks and applications.

HOW WE DO THINGS

SCOPING

Understanding your network and operations is key to successful compliance. We help you identify all the components that need to be included. Also, what can be removed.

ASSESSMENT

Measurement against the Cyber Essentials questionnaire framework. We help you carefully review each requirement to determine how secure your organisation is.

CERTIFY

Guidance and support to secure any identified weaknesses. Producing valuable documentation to operate securely. Final completion and submission of the questionnaire.

WHAT YOU GET FOR YOUR MONEY

First and foremost you are going to get support. Support from our certified and experienced team of Cyber Essentials Assessors.

Your objective is to successfully complete the Cyber Essentials Questionnaire. On contacting us, we will provide and explain this document to you.

We take time to understand your networks, applications and processes. What your business objectives are. Why you need to be certified.

With this knowledge, we are able to guide you to correctly complete all documentation. If there are gaps, we can advise on corrective steps.

This all leads to a correctly completed questionnaire which we process on your behalf.
