

## CYBER FRAUD AWARENESS

### GET YOUR STAFF CYBER FRAUD AWARE

It is widely accepted that staff are one of the easiest ways of bypassing a company's IT security defences.

Fraudsters capitalise on human error. When staff are busy or distracted, they can make simple mistakes that offer direct access to a company's network. All the investment in firewalls and security monitoring is rendered useless at a single stroke.

Your organisation and staff are regularly being targeted by harmful emails and messages. It is therefore essential that people are aware of what to expect and how to deal with suspicious communications.

One of the most effective ways of dealing with these threats is by educating people. Explaining why certain messages should be ignored. How to identify and deal with malicious or problem emails.

We help staff understand email and message threats.

We use a blend of practical tests combined with on-demand training to get people aware and ready to act in the right way.

Our approach is practical and low cost. We encourage people to recognise suspicious messages and stay aware and safe.

Technology solutions alone are simply not up to the job.

Human awareness is, by far, the most powerful tool in your cyber security toolbox.

**“** I have always found Ambersail to be a great company to work with, complemented with extremely proactive and talented staff. All information provided is given in a clear, easy to understand format with guidance on how to remediate any potential threats found.

CIO - Wilmott Dixon

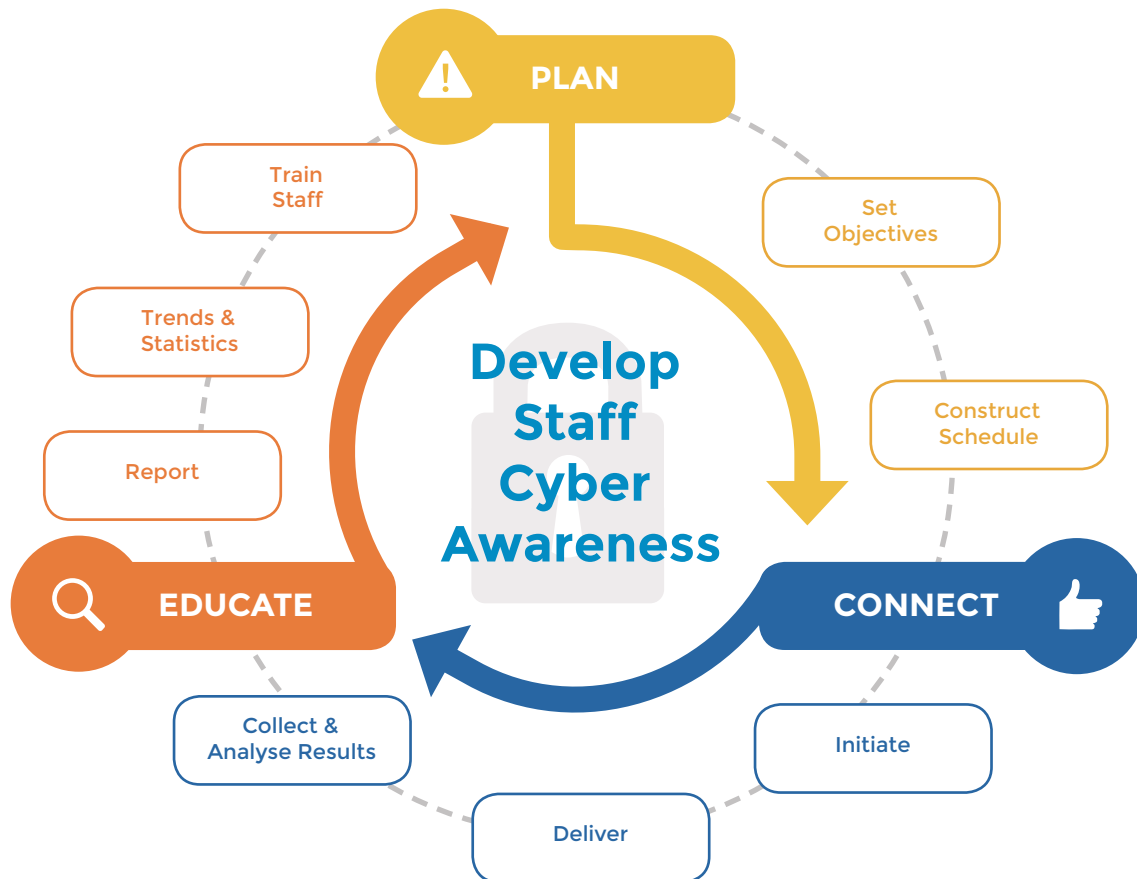

#### FEATURES

- ✓ Customised staff training and development.
- ✓ Engaging, challenging Elearning sessions.
- ✓ Test your staff with our Phishing email system.
- ✓ Ready to go when you are.
- ✓ Easy to understand reports with clear advice.
- ✓ Policies and procedural guidance.
- ✓ UK based team. Working across the world.

## HOW WE CAN EDUCATE YOUR STAFF

### ! PLAN

We suggest and identify what type of awareness needs to be delivered and which users need to be included in the sessions. Phishing emails, web sites, electronic messaging, phone calls or a combination of all.

### 👍 CONNECT

Targeted communications such as phishing emails are sent and responses recorded. Users can be educated at this stage should links be followed and action taken. A full breakdown of results is available for review.

### 🔍 EDUCATE

Probably the most important part of our programme. Tests and awareness sessions are available for people to consolidate knowledge and review best practice. Crafted to be engaging and to appeal to technical and non-technical people.

### WHAT YOU GET FOR YOUR MONEY

Choose the education and awareness plan to suit your business. To suit your staff.

Our Elearning courses are easy to access, engaging and quick to complete. Designed to hold the interest of all staff. Courses are reinforced by topic based quiz sessions. Sessions are tracked and results recorded.

You will get realistic emails sent by our team of experts. Crafted to suit your business. Designed to test how resilient your staff are to fraud attempts.

Testing and assessment can include physical controls such as whether unauthorised people can access confidential buildings and offices. Our team specialises in identifying weak access controls.

You can expect easy to understand results with clear advice on reducing the risk of cyber fraud.
